

CAREER TRANSITIONS

SECTION G: ASSESSMENT TOOLS

The following pages comprise background information and strategies for assessing student achievement and the assessment tools that are listed in Sections D, E and F of this Guide.

This section of the Guide to Standards and Implementation has been designed to provide a common base of understanding about the level of competencies students are expected to demonstrate to successfully complete a module. The goal is to establish assessment standards for junior and senior high school students that are fair, credible and challenging.

These tools will assist teachers throughout the province to more consistently assess student achievement. The purpose of expanding on the assessment standards is to:

- increase confidence among students, parents, business/industry and post-secondary that students can demonstrate the competencies specified in the modules they have completed
- encourage fairness and equity in how students' efforts are judged
- enable learners to focus effort on key learnings
- support teachers and community partners in planning and implementing CTS.

These tools were validated during the optional stage of CTS implementation.

TABLE OF CONTENTS

ASSESSING STUDENT ACHIEVEMENT

Assessing Student Achievement in CTS	G.4
Assessing Student Achievement in Career Transitions	G.6

Assessment Tools Generic to CTS:

Basic Competencies Reference Guide	G.8
Generic Rating Scale	G.10

Frameworks for Assessment:

CTSISS: Issue Analysis	G.11
CTSLAB: Lab Investigations	G.12
CTSNEG: Negotiation and Debate	G.13
CTSPRE: Presentations/Reports	G.14
CTSRES: Research Process	G.15

Assessment Tools Generic to Career Transitions:

Portfolio Assessment	G.16
Workplace Safety Assessment Chart	G.19

Assessment Tools Specific to Themes and Courses in Career Transitions:

CTR1010/2010/3010: Career Readiness Courses	G.20
CTR2020/3020: Leadership Courses	G.23
CTR2030/3030: Leadership: Governance Courses	G.26
CTR1210/2210/3210: Job Safety Skills Courses	G.29
CTR Project: Career Extensions Courses	G.31

Assessment Tools Specific to Job Safety Skills Courses:

CTR1210-3: Occupational Health and Safety Multiple Choice Test	G.34
CTR2210-1: Ergonomics	G.39
CTR2210-2: Scenario Assessment	G.41
CTR2210-3: Transporting Dangerous Goods Theory Test	G.43
CTR2210-4: Fire Extinguishers Practical Test	G.49
CTR3210-1: Loss Control	G.50
CTR3210-2: Investigation	G.52
CTR3210-3: Safety Program	G.54

Assessment Tools Specific to Client Service Courses

Individual Client Service Assessment Tool	G.56
CTR1030/2040/3090: Client Service Logbook	G.58

ASSESSING STUDENT ACHIEVEMENT IN CTS

The CTS assessment standards assess two basic forms of competency:

- What can a student *do*?
 - **make** a product (e.g., wood bowl, report, garment)
 - **demonstrate** a process
 - strand-related competencies (e.g., keyboarding, hair cutting, sewing techniques, lab procedures)
 - basic competencies (e.g., resource use, safety procedures, teamwork).
- What does a student *know*?
 - knowledge base needed to demonstrate a competency (link theory and practice).

CTS Defines Summative Assessment Standards

The assessment standards and tools defined for the CTS courses, referenced in Sections D, E and F of this Guide, focus on the final (or summative) assessment of student achievement.

Assessment throughout the learning period (formative assessment) will continue to evaluate how students are progressing. Teachers direct and respond to students' efforts to learn—setting and marking tasks and assignments, indicating where improvement is needed, sending out interim reports, congratulating excellence, etc.

Teachers will decide which instructional and assessment strategies to apply during the formative learning period. As formative and summative assessment are closely linked, some teachers may wish to modify the tools included in this section to use during the instructional process. Teachers may also develop their own summative assessment tools as long as the standards are consistent with the minimum expectations outlined by Alberta Learning.

Grading and Reporting Student Achievement

When a student can demonstrate ALL of the exit-level competencies defined for the course (course learner expectations), the teacher will designate the course as “successfully completed.” The teacher will then use accepted grading practices to determine the percentage grade to be given for the course—a mark not less than 50%.

The time frame a teacher allows a student to develop the exit-level competency is a local decision. NOTE: The *Guide to Education: ECS to Grade 12* specifies that students must have access to 25 hours of instruction for each credit. Students may, however, attain the required competencies in less time and may proceed to other courses.

Teachers are encouraged to consult their colleagues to ensure grading practices are as consistent as possible. Further information about assessing and reporting student achievement in CTS is provided in the *CTS Manual for Administrators, Counsellors & Teachers* (Assessing Student Achievement).

Components of Assessment Standards in CTS

The following components are included in each course:

- **general outcomes** (in the shaded left column of the course) define the exit-level competencies students are expected to achieve to complete a course. Each general outcome defines and describes critical behaviours that can be measured and observed. The student must meet the standard specified for **ALL** general outcomes within a course to be successful.

- **suggested emphasis** (in the right column of the module) provides a guideline for the relative significance of each MLE and can be used to organize for instruction.
- **criteria and conditions** (in the middle column of the module) set the framework for the assessment of student competency, specifying the minimum standard for performance and including a reference to assessment tools, where appropriate.

Criteria define the behaviours that a student must demonstrate to meet the designated standard. For example, the criteria could describe the various techniques that must be demonstrated when using a tool, and/or describe the minimum components of a project the student must complete.

Conditions outline the specifications under which a student's competency can be judged. For example, the conditions could specify whether the assessment should be timed or not, or if the student should be allowed to access to support resources or references.

Standard may be defined by (1) assessment tools, which are referenced in this section (or sometimes in approved learning resources) and/or (2) "illustrative examples" of student work, if appropriate.

Assessment Tools included in this section of the Guide tend to be of two types:

- tools generic to a strand or to the entire CTS program; e.g., a standard five-point rating scale is used in all strands. Other generic tools include assessing reports and presentations and lab safety checklists. (*Names of these tools include the strand code [e.g., "INF" for Information Processing] and a code for the type of tool [e.g., "TDENT" for Text-Data Entry].*)

- tools specific to a module; e.g., assessment checklist for assessing a venture plan in Enterprise and Innovation or a checklist for sketching, drawing and modelling in Design Studies. (*Names of these tools include the module code; e.g., "INF1010-1" indicating that it is the first module-specific tool used in Information Processing Module 1010.*)

Development and Validation Processes

The "Criteria and Conditions" and "Suggested Emphasis" columns have been validated with extensive input from teachers, professional associations/contacts and post-secondary institutions. The goal was to prepare well-structured assessment standards and related assessment tools that:

- establish an appropriate level of challenge and rigour
- relate directly to the type of learning described in the curriculum standard
- are easy to understand
- are efficient to implement
- can provide a consistent measure of what was expected to be measured.

As students and teachers work with the assessment standards and tools, it is expected that levels of performance will increase as more and more students are able to achieve the minimum standard. Therefore, the assessment standards and related tools will continue to be monitored, and revised as necessary to ensure appropriate levels of rigour and challenge, and successful transitions for students as they leave high school and enter the workplace or related post secondary programs.

ASSESSING STUDENT ACHIEVEMENT IN CAREER TRANSITIONS

The Career Transitions curriculum is based on the premise that recognizable outcomes may be compared to stated standards. In Career Transitions, the standards identify students' growth in knowledge, skills and attitudes. The curriculum defines outcomes through the module learner expectations (MLEs) and specific learner expectations (SLEs). It also suggests criteria and conditions for assessment and the emphasis to be placed on each expectation. These elements combine to provide an overall framework for instruction and assessment.

Assessment Strategies and Tools

A variety of tools have been provided for your reference and use. In the development of the assessment materials there has been an attempt to keep it as simple as possible while also providing guidance and assistance to teachers. The tools are intended to help you assess students' work as accurately and consistently as possible by stating standards of performance for elements felt to be important within the curriculum as a whole or in specific modules. They also provide standards for "basic competencies" students should be able to demonstrate while engaged in learning.

The tools that have been developed are intended to be used as summative assessment tools. Depending on the way the classroom is organized, they may be used when the student has indicated he or she is ready for the final assessment or by the entire class at the end of the learning period.

Tools Generic to CTS

Tools, generic to CTS, may be used to guide assessment across the CTS curriculum generic tools include:

- CTSISS: Issue Analysis
- CTSLAB: Lab Investigations
- CTSNEG: Negotiation and Debate
- CTSPRES: Presentation/Reports
- CTSRES: Research Process.

Tools Generic to Career Transitions

Throughout the Career Transitions strand, students have the opportunity to develop personal management skills in an applied learning context. A variety of tools are provided for this purpose. For example, the "Portfolio Assessment and "Workplace Safety Assessment Chart" may be used, as appropriate, to assess specific student competencies in any of the Career Transitions modules.

Tools Specific to Career Transitions Themes and Modules

The themes and modules that comprise the Career Transitions strand are interrelated but diverse. The assessment tools provided attempt to reflect both this interrelatedness and this diversity.

The tools developed to assess specific MLEs in Career Transitions modules are labelled with the module number and the tool number (e.g., CTR1010-1 or CTR1010-2). They are referred to under the criteria and conditions section.

Each theme has its own set of assessment tools and in most cases, a single tool may be used to assess student competency at each of the three levels of modules, introductory, intermediate and advanced, contained within most themes.

Assessing competencies in Practicum modules will usually be performed by the credentialling agency. The teacher should, however, whenever possible participate in the student assessment process and require the student to maintain and submit a portfolio.

In some instances where the tool suggested is a test (e.g., Job Safety Skills modules), a sample test or sample questions has been included. The authorized learning resources for Career Transitions include teaching resources that have test banks and other suggested assessment strategies. It is recommended that these be used to prepare appropriate test banks. Numerous assessment tools have been developed for module specific research and analysis. Sample checklists to assess basic competencies are included. Choose the one most appropriate. Assessment materials currently being used may continue to be used if they assess the criteria and conditions for an MLE.

Emphasis for Assessment

The “Suggested Emphasis” column provides a guideline for the relative significance of each MLE to assist in organizing for instruction. The basic competencies are expected to be integrated throughout and therefore the tools have been designed to assess the relevant basic competencies and the product, process and/or theory. The exception to this would be when a test bank is being used. In this case it is recommended that basic competencies be assessed separately.

BASIC COMPETENCIES REFERENCE GUIDE

The chart below outlines basic competencies that students endeavour to develop and enhance in each of the CTS strands and modules. Students' basic competencies should be assessed through observations involving the student, teacher(s), peers and others as they complete the requirements for each module. In general, there is a progression of task complexity and student initiative as outlined in the Developmental Framework[★]. **As students progress through Stages 1, 2, 3 and 4 of this reference guide, they build on the competencies gained in earlier stages.** Students leaving high school should set themselves a goal of being able to demonstrate Stage 3 performance.

Suggested strategies for classroom use include:

- having students rate themselves and each other
- using in reflective conversation between teacher and student
- highlighting areas of strength
- tracking growth in various CTS strands
- highlighting areas upon which to focus
- maintaining a student portfolio.
